

InterfaceGSM

.....best solution at hand

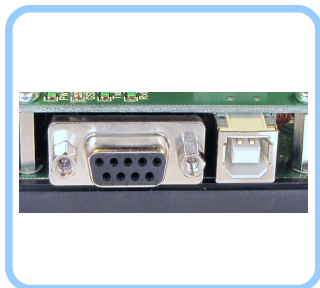

InterfaceGSM is an electronic device which allows connecting Motorola G24, G24 Lite, H24, and W24 module with other devices and other electronic and ICT systems.

SPECIFICATION

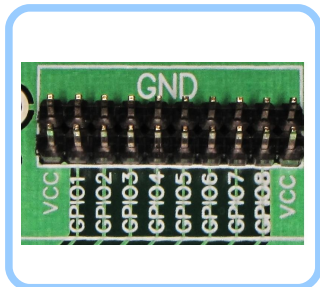

InterfaceGSM

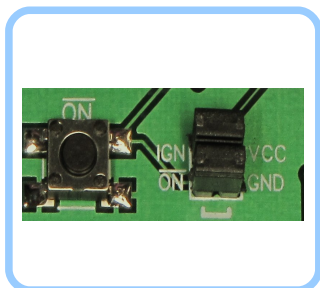

Works with Motorola G24,
G24 Lite, H24 and W24 modules

RS232 and USB
communication ports

GPIO output port
for Motorola module

Module operating through ON
and IGN pin outputs

Product to be used in industrial,
residential and commercial environment.

Product characteristics

Telecommunication, electronic and ICT systems (computers, industrial automation systems) connection with the use of Motorola modules

GPIO output ports of the module allowing to connect it to additional devices

Status LEDs informing about the module status

HRST button enabling module power off (device reset)

ON button to turn the module on and off

ON and IGN pins enabling external signal operation (turning on and off)

AC/DC voltage converter enabling stable operation

Compact housing enabling fast installation and electronic parts protection against mechanical damage

Technical data

Interface model	InterfaceGSM V3.x
Compatible with Motorola modules	G24, G24 Lite, H24, W24
Interface device communication with external devices	RS232 / USB
Power supply	Stabilized 12V DC (+-3V tolerance), min. 700mA recommended
Current consumption (interface only)	0,05mA
Weight	200g
Dimensions	85mm x 130mm x 35mm
Operating temperature and humidity	from -20°C to 60°C, 90%

The set contains:

- InterfaceGSM,
- screws, nuts and distance holders to mount Motorola module,
- printed instruction manual,
- warranty card.
